

Circular NR-01 — Open Banking API Standards — New Mandatory Implementation

Reference:	FRA/NR/2025/001	Issue Date:	15 Mar 2025
Effective Date:	01 Oct 2025	Response Deadline:	31 Jul 2025
Issuing Authority:	Financial Regulatory Authority	Classification:	MANDATORY

1. New Mandate

This circular introduces entirely new obligations for Open Banking. All licensed retail banks must implement FAPI 2.0 compliant APIs for Account Information (AIS), Payment Initiation (PIS) and Confirmation of Funds (CoF) by 1 Oct 2025. There is no predecessor requirement — this is a new regulatory obligation.

2. Technical Standards

APIs must maintain 99.5% uptime SLA and respond within 1,500ms for 95th percentile requests. OAuth 2.0 with PKCE is mandatory for all API authorisation flows. A dedicated sandbox environment must be made available to TPPs from 1 Jun 2025.

3. Consent Framework

Customers must be able to grant, modify and revoke TPP consent at account level with a maximum consent period of 90 days. Real-time access notifications must be sent to customers for every TPP data access event.

4. Conformance Testing

Obtain Authority Conformance Certificate by 31 Jul 2025. Firms failing testing must submit a remediation plan within 10 business days.
